

Our specialties are the core areas where our leaders have years of industry experience. Applications and Products developed by us in the core areas have given us an edge to understand the business requirements and deliver solutions in least possible time:

- Numerous Mobil Apps
- Analytics
- GIS and Location Intelligence
- Oracle Cloud
- Gaming, Graphics and 3d modelling
- Web Apps & Cloud Computing

Our team is experienced and qualified to create Web Applications, native applications in Android, iOS, Windows and hybrid apps in React Native, Flutter or Xamarin. We are not only making the apps from scratch but also doing Updates, Additions and Enhancements in the existing apps.

Who We Are

About Us

Bharatlogic provides professional Software Development Services that help our customers to promote innovation. Our development center in India is equipped to deliver solutions for:

- Mobile Apps Development
- Web Applications Development
- Product Development
- Oracle Cloud
- Desktop Apps Development
- Application Migration Maintenance

Our Achievements:

Our focus on quality and consistent on-time delivery has really yielded a great success and also paved the way to achieve following feats in a short span of time:

Our Feedback score: **5.00 star**

Top rated Agency badge

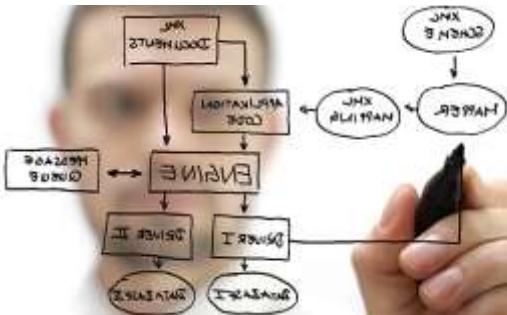

Job success rate: **100%**

bharatlogic.com

Bharatlogic is a talented, experienced and dedicated mobile team with 4 years of average **industry** experience in Mob app development. We have 2 years of experience serving the international markets since 2012. We are situated in Mohali, the industrial hub of Punjab.

What We Do

Our designers possess great cosmetic designing skills, make well executed design appropriate to the platform and devices. While creating the design, they consider the pixel perfect, typography, UI/UX - using elements and gestures and navigation, color scheme and contrast. The final product that they make will be beautiful, functional and fun to use. We are experts in Mob app development, self -starters, hard workers, reliable and attention to detail too. We are easy to work with. Besides programming our developers are capable to set up Servers/web services.

"BharatLogic are a great, experienced team of Mobil and Backend developers whom are up to any challenge thrown at them. They are responsive and possess great communication skills which is backed by a high level of knowledge and skills in their field"

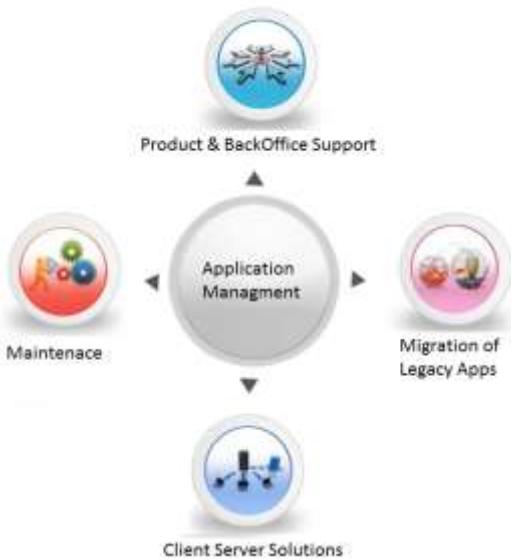

—Alexander, avp-productions

Services

Bharatlogic provides professional Software Development Services that help our customers to promote innovation. With an expert team of developers and with world class project execution center in India we have forte in delivering solutions for:

1. Application Management
2. Application Development
3. Product Development
4. Mobile Development
5. Gaming Apps Development

Products & Services

Bharatlogic provides high-quality software development services that help clients accelerate business innovation. With a range of flexible delivery options, Bharatlogic offers a significantly lower-cost, lower-risk alternative to traditional software development solutions. Our application development team delivers high quality, flexible solutions that are easy to maintain, modular to facilitate enhancements and are extremely reliable, secure and easy to deploy.

Application Management

Bharatlogic handles the transition by adopting 3 steps approach to ensure effective Application Migration:

1. Build understanding and map required services.
2. Create transition plan definition to ensure effectiveness of the offshore team.
3. Deliver managed services that are monitored and controlled throughout the operating life cycle of the contract.

"Great Job Team! We will continue to use Bharatlogic team for ongoing projects. "

- Nevada Reality Solutions, Las Vegas, NV

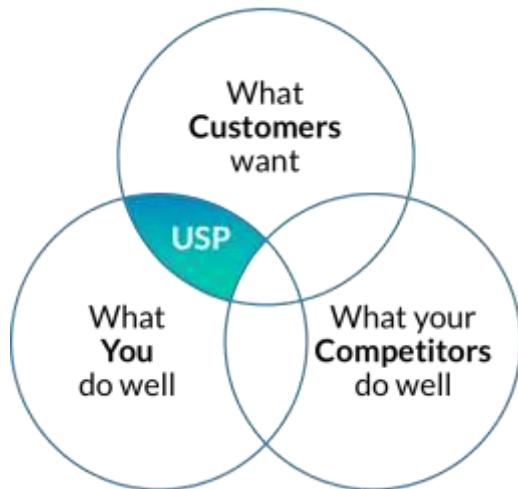

Product Development

Bharatlogic provides software product development for independent software vendors (ISVs). They face intense competition in markets where fast innovation is the norm. To prosper, they must bring new products to market rapidly, with attractive pricing and uncompromised quality. In this environment, vendors typically achieve product differentiation and market edge by focusing on specific vertical sectors. They build and retain teams of specialists tuned to delivering the best available solutions in their chosen market areas.

We offer following benefits:

1. Enhanced Innovation
2. Reduced Time to Market
3. Reduced Total Cost of Ownership

Key Points

Services Provided

- Business Analysis
- Architecture
- Development
- QA
- Support and Maintenance
- Production Support

Technical Stack

- Microsoft Technologies
- Mobile Apps (iOS Native, Android Native)
- MEAN Stack
- MERN Stack
- LAMP Stack
- Scalable Backend using Devops and Kubernetes
- Java (core, servlet, jsp, swing, hibernate, spring Boot),
- Python

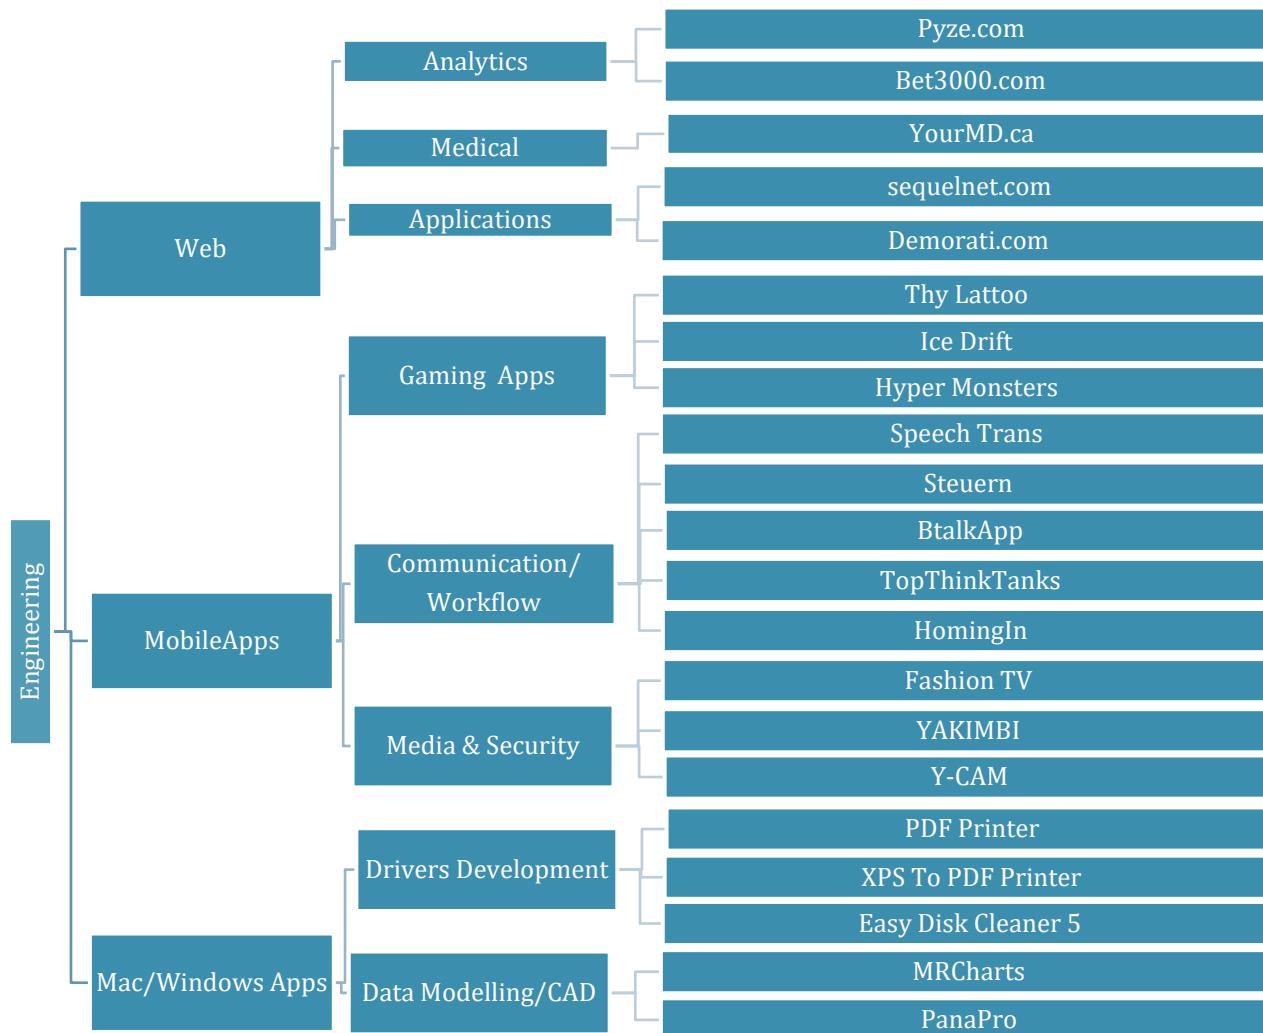

USP

- Preferred Development/QA Partner for 70+ Organizations
- Deep knowledge of Manufacturing, Medical, CRM, Finance Domain
- Known for commitment, quality resources and timely deliverables
- Niche skill vendor –AWS, Google Cloud, Oracle Cloud, Microsoft Technologies
- Team of 100+ Developers to cater to an array of Tech Stacks and domains

“Great Job Team! We will continue to use Bharatlogic team for ongoing projects. ”

- Nevada Reality Solutions, Las Vegas, NV

Products & Services Verticals

Web Applications Development

Many years of experience and extensive knowledge in SQL Database Programming, Online Database Programming, Custom Business Database Programming, eCommerce Applications, and Custom Enterprise Database Applications.

The most advanced tools are used to create robust and state-of-the-art applications that can be implemented on many server platforms and web technologies.

Our expertise include:

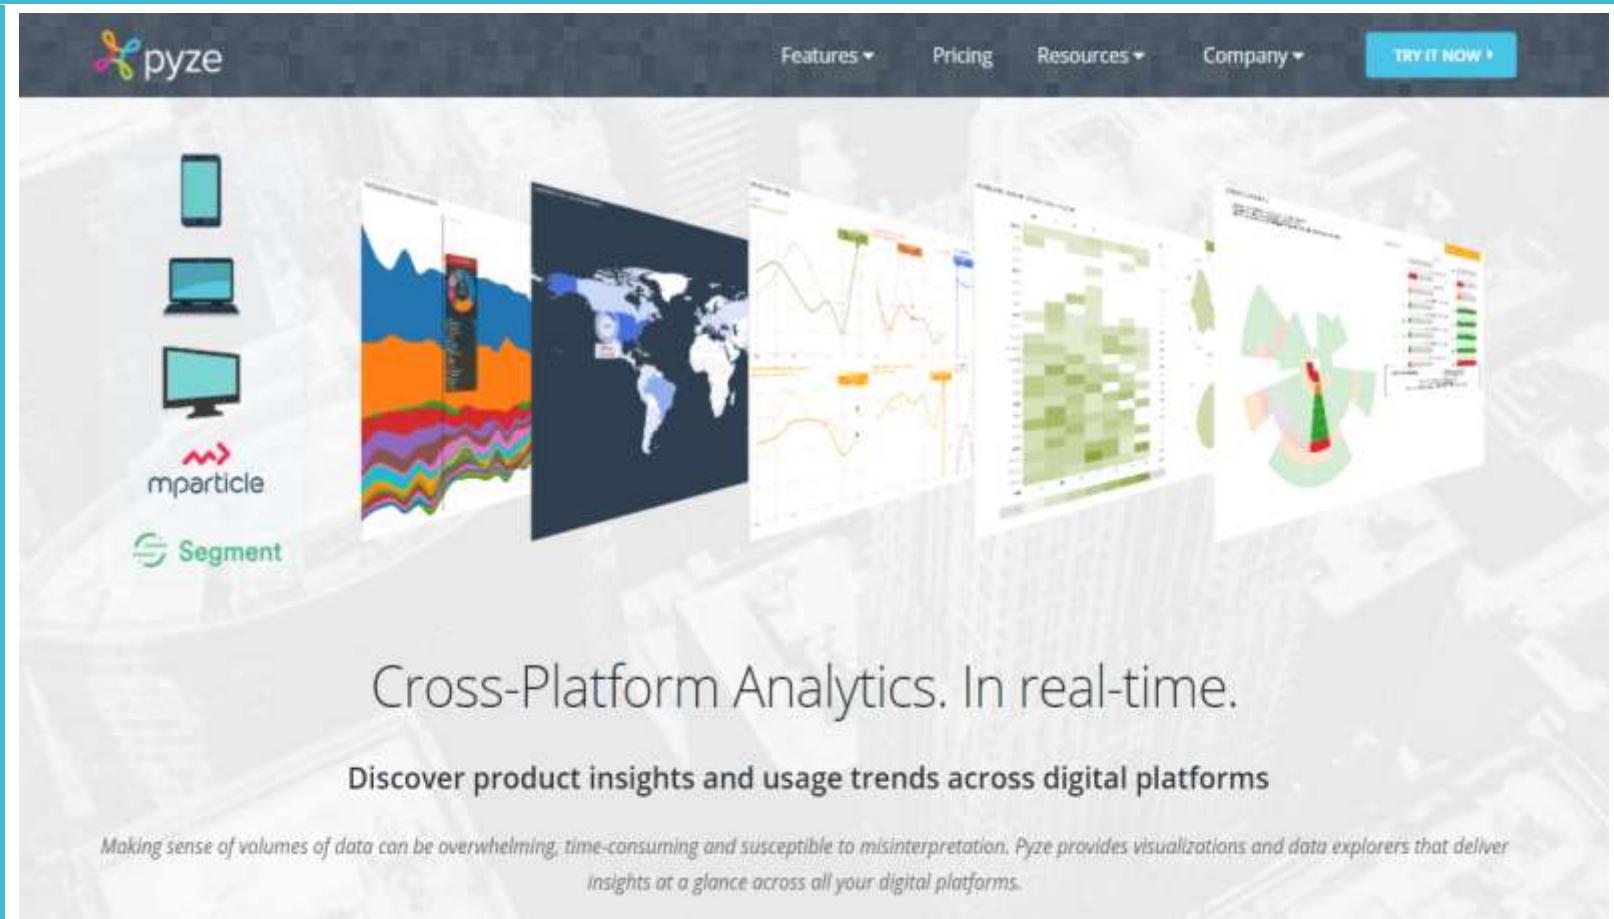

- FORTE in MERN, MEAN and LAMP stacks
- Substantial experience with major PHP framework
- Demonstrable examples in NODE.JS, AngularJS, JQuery tools
- Hands on experience with Performance, Load testing
- Security integration
- Site Management

Auto-discover user screen paths across web, mobile, and tv apps based on each user's behavior. See which user flows are the most popular, where users are dropping off, where users are spending most of their time and unearth optimization opportunities.

An online Doctors appointment booking platform developed

The platform is developed by BharatLogic team from scratch

Live Chat, Live Video Call, Online Appointments, Online Counselling, Queue Management, Voice based support implementation

The screenshot shows the Pyze.com homepage. At the top, there is a navigation bar with the Pyze logo, 'Features', 'Pricing', 'Resources', 'Company', and a 'TRY IT NOW' button. Below the navigation bar, there is a section featuring icons for mobile, laptop, and desktop devices, along with logos for mparticle and Segment. To the right of these icons, there are several data visualization components: a world map with colored layers, a line graph showing trends over time, a heatmap, and a circular sunburst chart. Below these visualizations, the text 'Cross-Platform Analytics. In real-time.' is displayed, followed by 'Discover product insights and usage trends across digital platforms'. A small note at the bottom states: 'Making sense of volumes of data can be overwhelming, time-consuming and susceptible to misinterpretation. Pyze provides visualizations and data explorers that deliver insights at a glance across all your digital platforms.'

AS name suggests Bet3000 places sports and live bets on countless events. State of art backend technology ensures availability of sportsbook. Transactions are secured and faultproof. We worked on specific modules of this web application

The screenshot shows the Bet3000.com website interface. At the top, there's a navigation bar with 'Sport' and 'Live' tabs, a date/time stamp (07.01.2022 00:41:15), and user account options ('Einloggen', 'Registrieren', and language/currency icons). A large banner in the center promotes a '20% GELD ZURÜCK' (20% cashback) offer, stating 'BEI UNS IST AN JEDEM 21. ZAHNTAG!' (At us on every 21st day!). Below the banner, the main content area displays several betting odds for various matches:

- Challenger > 2022 Challenger Buenos Aires, Argentina Men Doubles:
 - Heute Juarez F / Rodriguez Taverna S F (1.60, 2.05)
 - 20:25 Descotte M F / Diaz Acosta F (1.80, 1.85)
- Challenger > 2022 Challenger Traralgon, Australia Men Singles:
 - Heute Fratangelo, Bjorn (1.80, 1.85)
 - 01:05 Lehhecka, Jiri (1.65, 2.05)
- WTA > 2022 WTA Melbourne 1, Australia Women Singles:
 - Heute Konjuh, Ana (1.85, 21.5, 1.85)
 - 01:00 Zheng, Qinwen (1.70, 2.00)
- WTA > 2022 Melbourne 2, Australia Women Singles:
 - Heute Begu, Irina-Camelia (2.30, 1.50)
 - 01:00 Anisimova, Aramanda (1.90, 21.5, 1.80)
 - 2.20, 1.60
- Challenger > 2022 Challenger Bendigo, Australia Men Double:
 - Heute Bemelmans R / Masur D (1.25, 3.20)
 - 01:00 Kizmanou N / Sofurat M (1.80, 2.00)

On the right side, there's a 'Wettschein' (Bet slip) section with a placeholder 'Bitte fügen Sie Ihre Wetten hinzu!' (Please add your bets) and a promotional banner for a '100 € BONUS' (100 euro bonus) for new customers, highlighting '0 % Wettgebühr' (0% betting fee) and '20 % Cashback'. Below that, another banner says 'JETZT NEU BEI UNS!' (Now available at us!) with 'Automatische Cashback-Teilnahme' (Automatic cashback participation) and 'Für alle Geräte eine Seite' (A page for all devices). At the bottom right is a QR code with the text 'UNSERE APP IM' (Our app in).

Médical Appointement Platform

Backend: Node, GraphQL, MongoDB

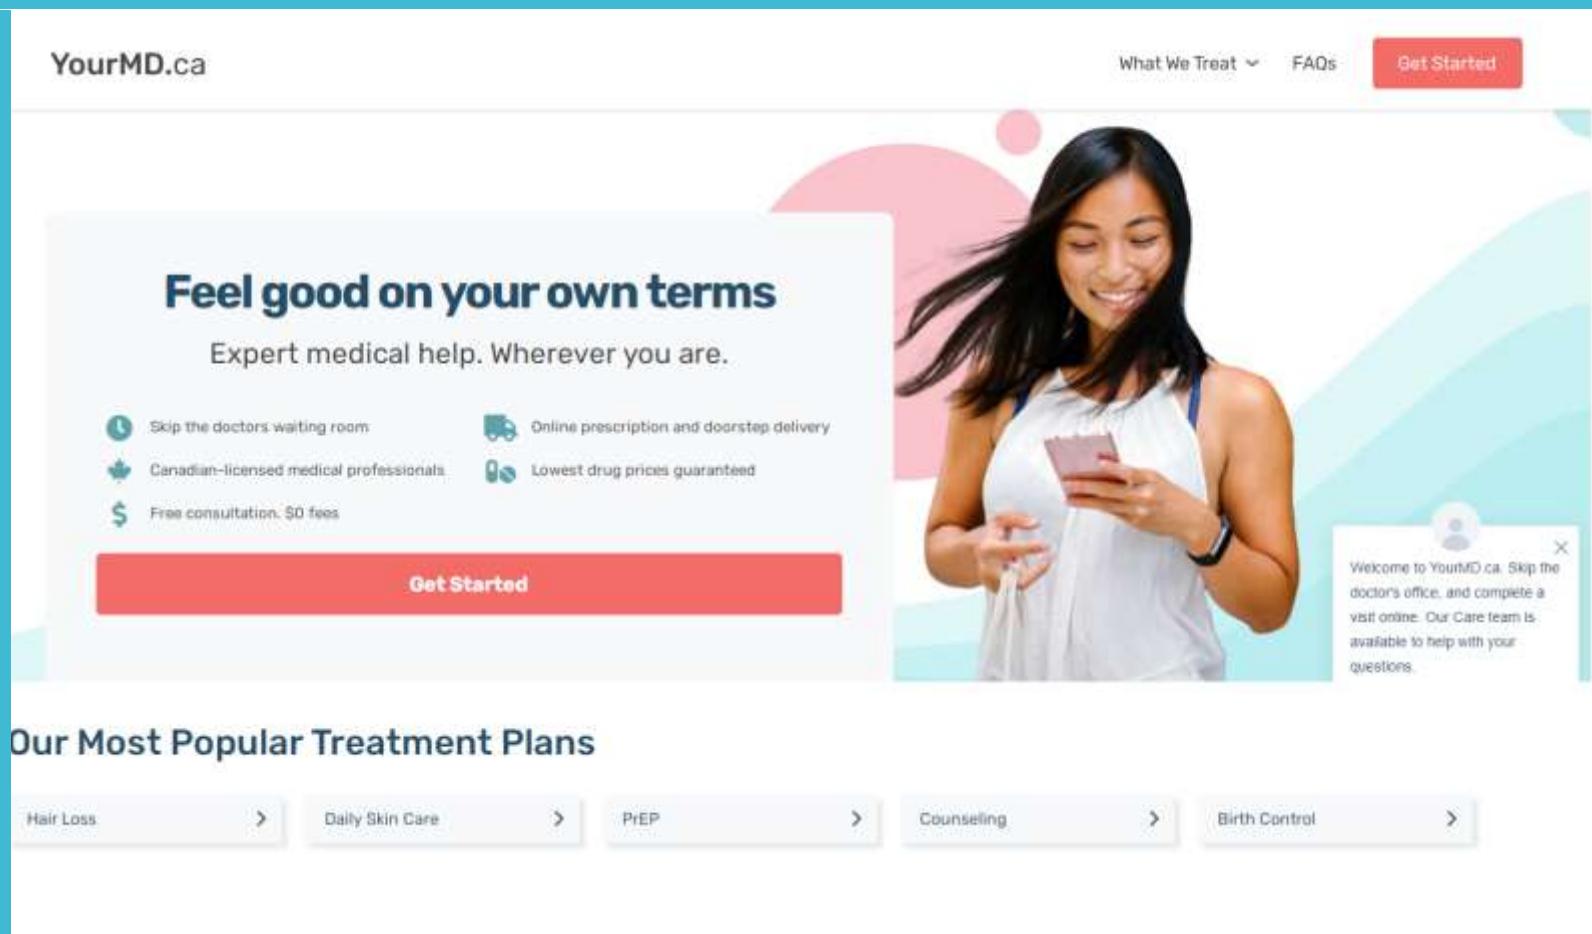

Frontend: React

Auto-discover user screen paths across web, mobile, and tv apps based on each user's behavior. See which user flows are the most popular, where users are dropping off, where users are spending most of their time and unearth optimization opportunities.

An online Doctors appointment booking platform developed

The platform is developed by BharatLogic team from scratch

Live Chat, Live Video Call, Online Appointments, Online Counselling, Queue Management, Voice based support implementation

Active Listings of Homes with ways to showcase main areas of homes, Evaluate estimated price of home and to connect Seller and Buyer.

An extensive database of real estate listings with unique feature of Exactimate

The listings data is greater than Zillow's database

Online integration with RETS (Real Estate Transaction Standards)

Seamless integration with Agents per location of homes.

The screenshot displays a property listing for a condominium at 26701 Quail Creek, #233, Laguna Hills, CA 92656. The listing is marked as ACTIVE. The property has 1 bed, 1 bath, and is 676 sqft, listed for \$399,999. It was listed 19 days ago. The listing includes a 'Remove from Tour' button, 'Live Chat' button, and 'Make an offer' button. The page features a large image of the exterior of a modern, single-story condominium with a stone facade and a large glass door. Below the main image are two smaller interior photos showing a kitchen and a bathroom. To the left, there is a sidebar with a 'Photos' section and a 'Features & Details' section. The 'Features & Details' section lists various amenities such as Year Built: 1980, Type: Condominium, Pool: Association, Community, Fireplaces: None, Spa: Association, Community, Heating: Central, Cooling: Central Air, Laundry: Electric Dryer Hookup, Inside, Stackable, Washer Hookup, Washer Included, and HOA Fees: \$417. The 'Property Description' section includes a detailed description of the unit's location and features, followed by a 'Read more about the Description' link. A map is also present at the bottom right of the listing.

Backend: Java Spring Boot

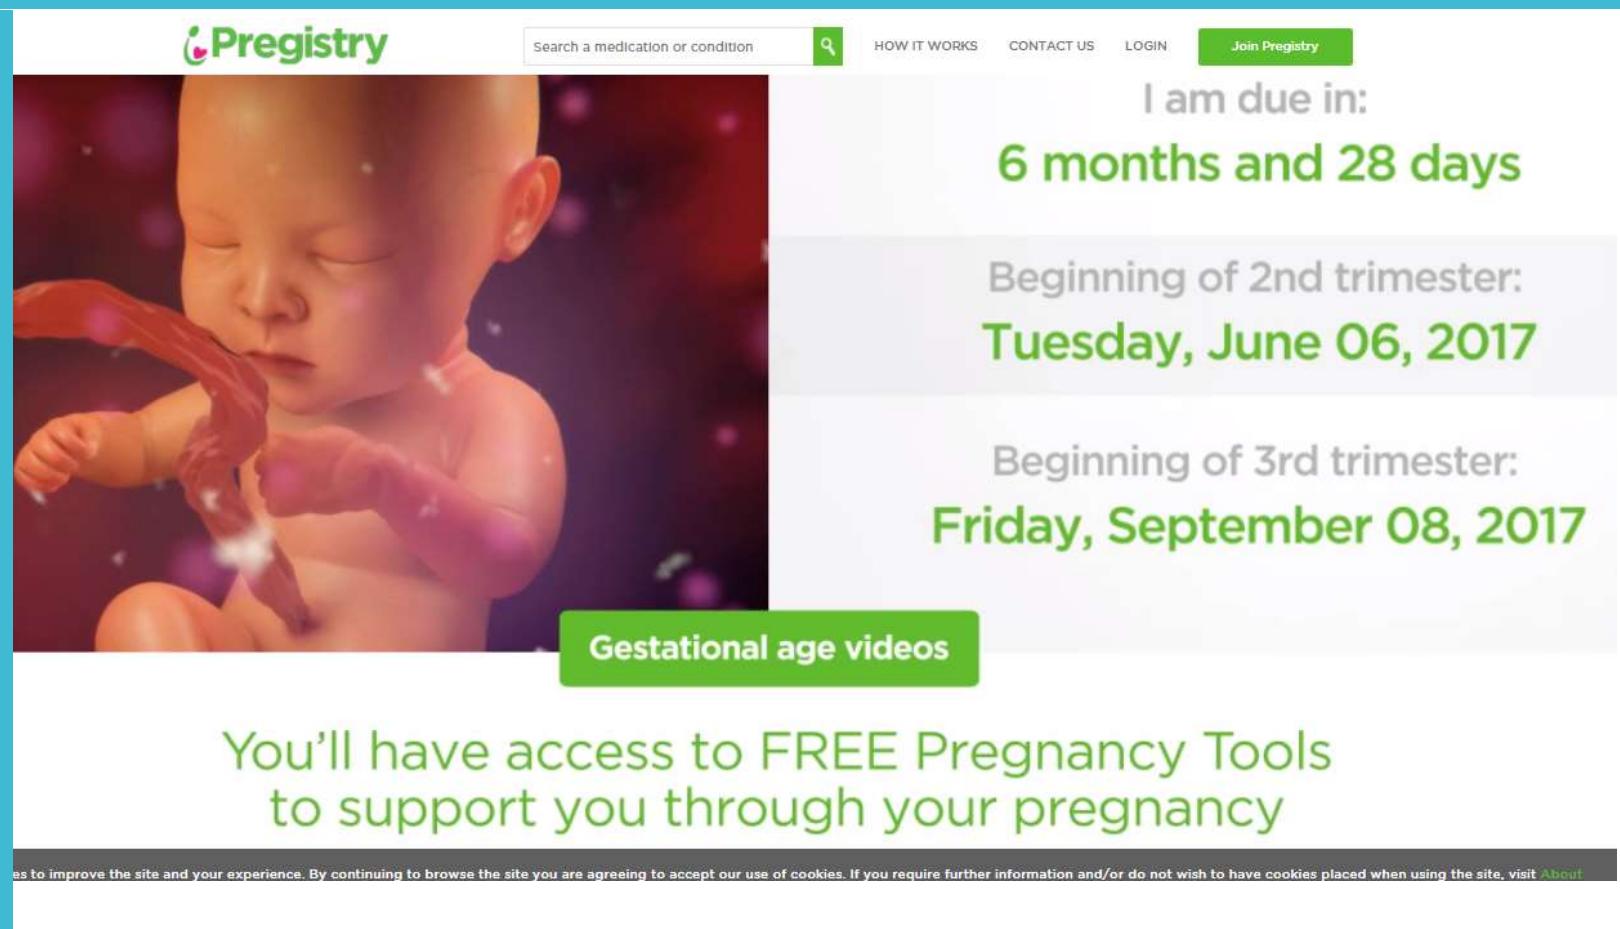

Frontend: React

Auto-discover user screen paths across web, mobile, and tv apps based on each user's behavior. See which user flows are the most popular, where users are dropping off, where users are spending most of their time and unearth optimization opportunities.

An online Doctors appointment booking platform developed

The platform is developed by BharatLogic team from scratch

Live Chat, Live Video Call, Online Appointments, Online Counselling, Queue Management, Voice based support implementation

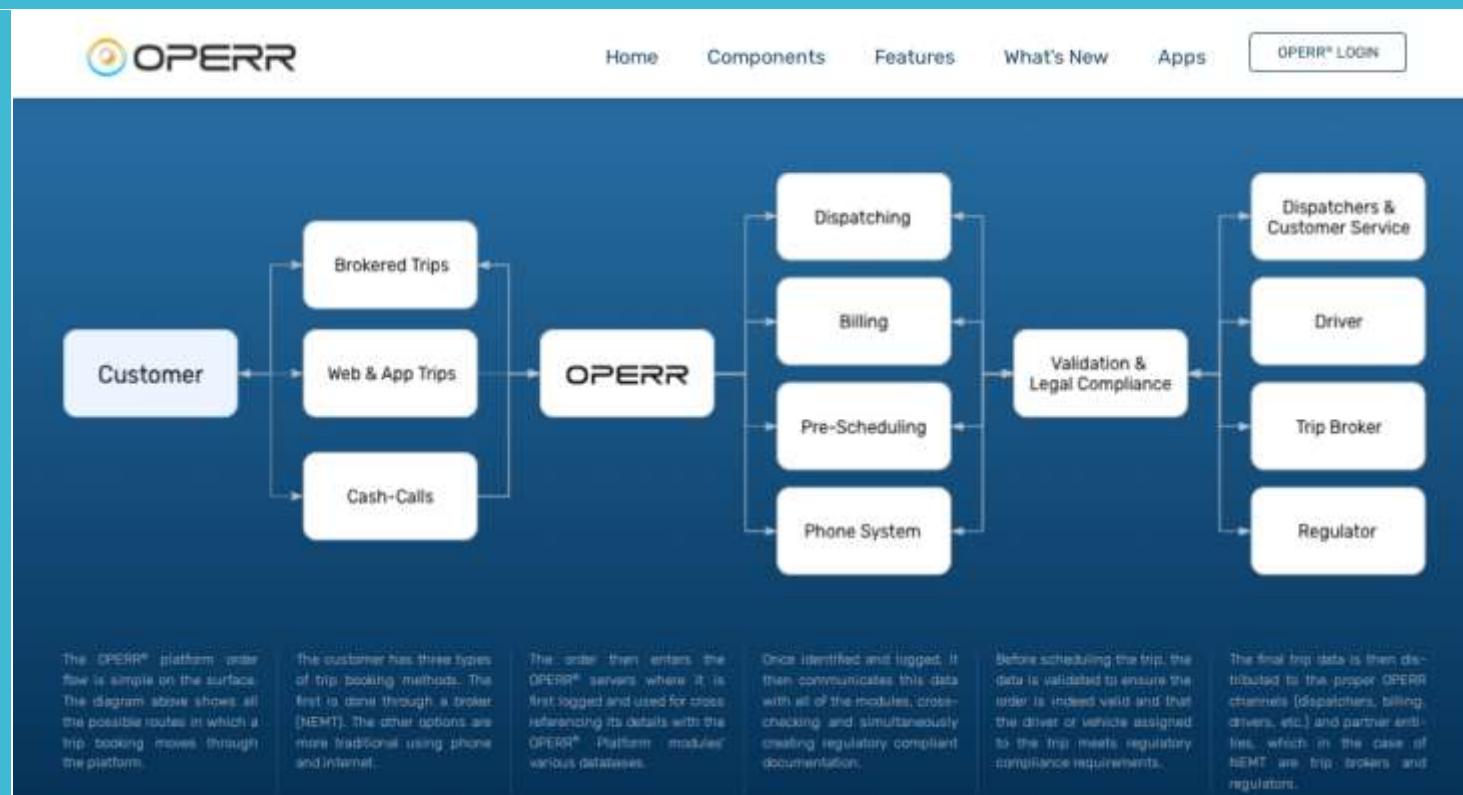

The OPERR® Platform's web-portal is the central access point of the platform. All user types, such as drivers, customers, administrators and others, can access their accounts and related modules through this OPERR® web-portal.

It's an ERP system comprising of Ordering, Dispatching , Billing and Admin Modules

Our developers do development on Ordering , Dispatching and Billing Modules

Operr has FE in Angular and BE in PHP and Java Spring Boot for different modules

Mobile Apps

Mobile applications were initially viewed by many as small screen adaptations of web-based apps. It is clear now that massive - and growing - adoption of mobile devices is changing the way people live and work. Mobile application development is no longer about adaptability; it is about innovation. Mobility opens up a virtually limitless world of opportunity and Bharatlogic supports clients who want to explore those opportunities through innovative application development.

iPhone & Android Native Development

iPhone's revolutionary touch-interface and Android's market place has for the first time created a user experience that has become game changer for mobile applications. This has opened a vast potential for wide range of applications to be ported on iOS & Android. we offer following development services for iPhone & Android platform:

1. Creating strategy and roadmap for development.
2. Development of native or Hybrid applications
3. Offshore based development for optimal cost and faster implementation cycles
4. iPhone/Android application support and maintenance
5. Testing the mobile applications across OS versions and devices

"We have had very Good experience working with Bharatlogic. They have not just developed the product, but also given us many inputs which corrected the product in development phase, this made them not just the vendor but also the partner in the technology development. The financial dealings were very clean, and one can trust on them that on financial matters - that they will be very fair on things, even in returning money if you drop some functionality in between of the project. The response time was pretty quick too."

- *Bolx USA LLC*

JS Platforms Mobile Development

With invent of Hybrid platforms tech community has accepted the change in the mobile landscape. We have team of developers with expertise in Java Script based development Platforms in Flutter and React Native. We provide following services in JS based mobile Apps Development:

1. Development of applications with responsive UI for both android and iOS mobile releases
2. Quality check on various Mobile devices and releases
3. Porting your existing application to Java Script based platforms
4. Application Support and maintenance

.net Platform Mobile Development

We have domain expertise to develop the native iOS, tvOS, WatchOS, MacOS and Windows with .net with native api. We offer following services for Xamrin platform:

1. Develop native and cross platform mobile apps with shared native user interface.
2. Develop across Windows and Mac with dev tools for entire app life cycle.
3. Integrate with Modern backend services and native APIs and more.

Workflow Apps

App Name: [Steuern](#)

Technology: NodeJS, Realm, Native iOS/Android,
AWS EC2, S3

Workflow app of a Swiss Financial firm to get the income returns uploaded, validated, approved, prepared and delivered at doorstep. The backend is scalable to handle the workflow of this detailed finance related data.

Communication Apps

App Name: Top Think Tanks

Technology: MEAN Stack, Native iOS/Android

Top Think Tanks is a free application provided by the Global Institute for Democracy and Strategic Studies (GIDSS, <http://gidss.com>) to be used by all politicians, policy makers, journalists, institutions, researchers, students.

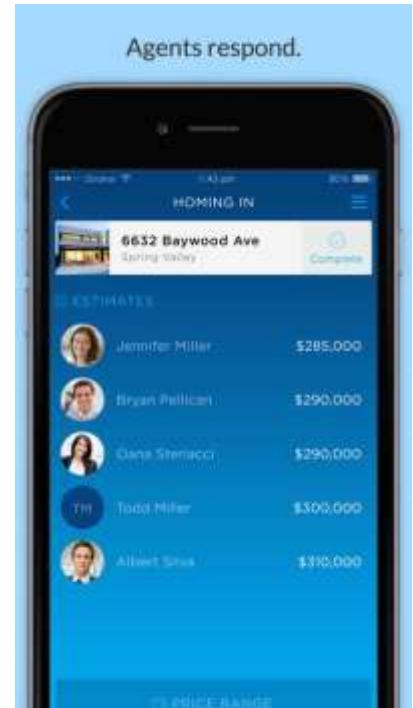

Workflow Apps

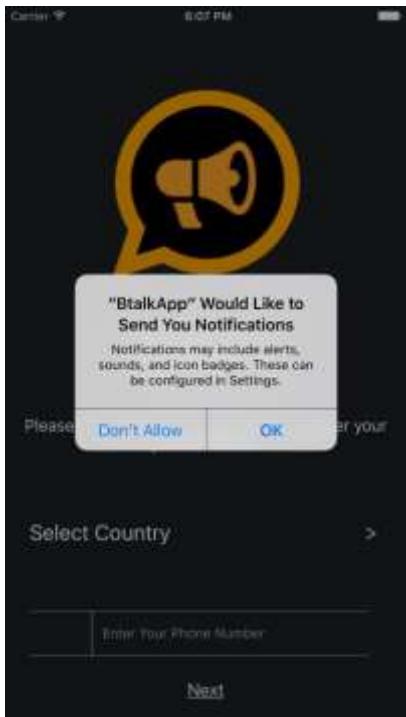

App Name: **HOMING IN**

Technology: Ruby On Rails, LAMP on Heroku,
Native iOS/Android

Homing In is the only "What's my home worth" app that uses actual real estate agents to give you a home value. Appraisers generally charge \$400 to give you the same value, and if you hired 10 appraisers you'd get 10 different home values. Each of the online Automated Home Valuation companies give different home values as well.

Communication Apps

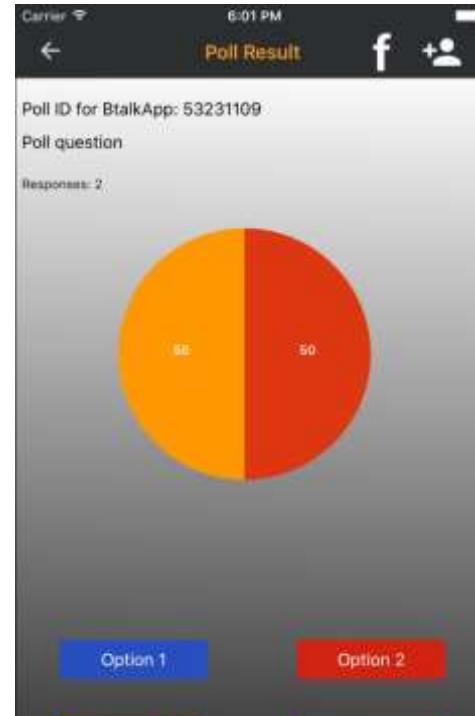

App Name: BTalkApp

Technology: XMPP, Node JS, Native iOS/Android

Go socialize with people without revealing your identity.

Say what you want without being in fear of getting caught. Enjoy the freedom of speech at extreme level be it with friends, family or work circle. Float polls without being targeted for asking wrong question. Open the question for whole world, and share the opinions on social media.

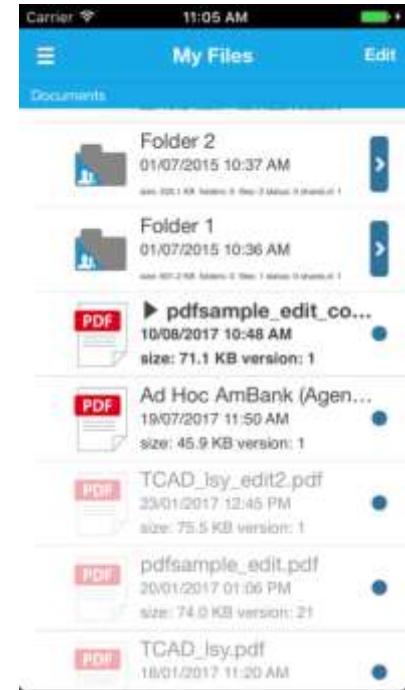

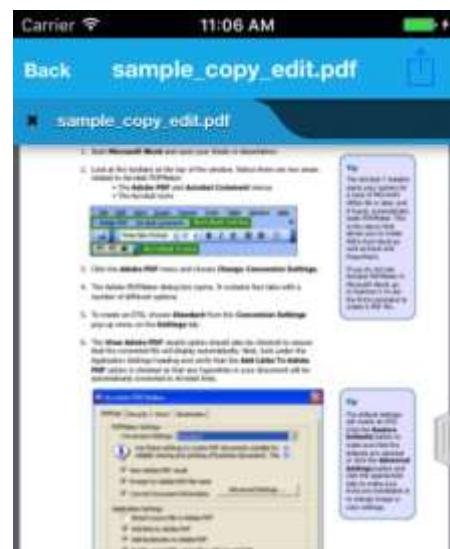

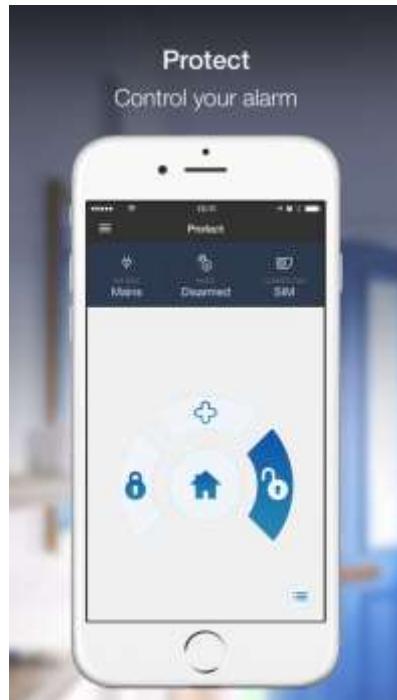

Security Apps

App Name: YAKIMBI

Technology: MEAN Stack, Ruby On Rails, Native iOS

A Secure document collaboration, storage & mobility solution. Yakimbi's server software can be installed on your own hardware. Access your files via the web and both on the iPad or iPhone. Perform collaboration activities such as sharing, PDF annotation, and Upload to shared folders. Work offline if you're on a plane, or if there is minimal internet connectivity. Collaborate now, all in one secure, sandboxed Yakimbi environment, the secure way to store, manage and share your data.

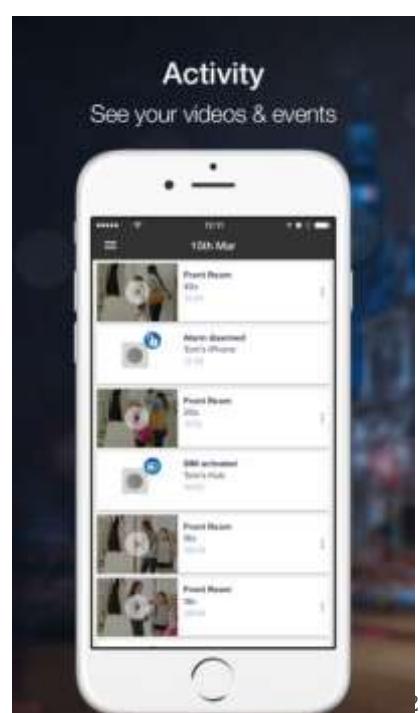

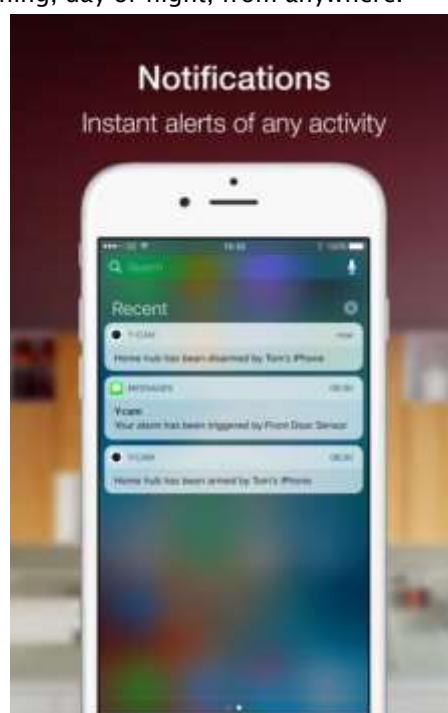

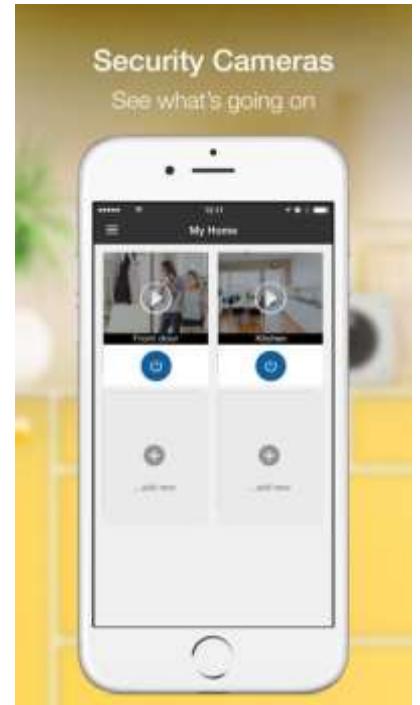

Security Apps

App Name: Y-CAM

Technology: MEAN Stack, Native iOS, Native Android, Streaming server

Y-cam's complete security solution combines proven burglar alarm and camera technology so you can protect your property and family with confidence. Get alerted instantly whenever an alarm triggers and, together with Y-cam's award-winning cameras, you can also see what's happening, day or night, from anywhere.

MEDIA APPS

App Name: FASHION TELEVISION

Technology: LAMP, Native Android

Fashion Television is the leading authority on fashion and lifestyle. This 24/7 fashion TV channel has an extensive library of fashion, lifestyle and entertainment content from all around the world including its very own original programmes and specials.

Features:

- Watch your favorite fashion TV channel live!
- Android TV Compatible!
- Uninterrupted live streaming!

MAC Development & WINDOWS Applications

With extensive experience in developing a wide array of MAC applications, We possesses proficiency in developing next-generation MAC applications. Our experience includes MAC programming for all the versions of MAC OS X including Mavericks, Snow Leopard, Leopard, Tiger, Panther and Jaguar. Our team is also adept in dual programming as well and can port PowerPC binaries to Universal architectures, perform WebKit programming and can develop plug-ins for Spotlight.

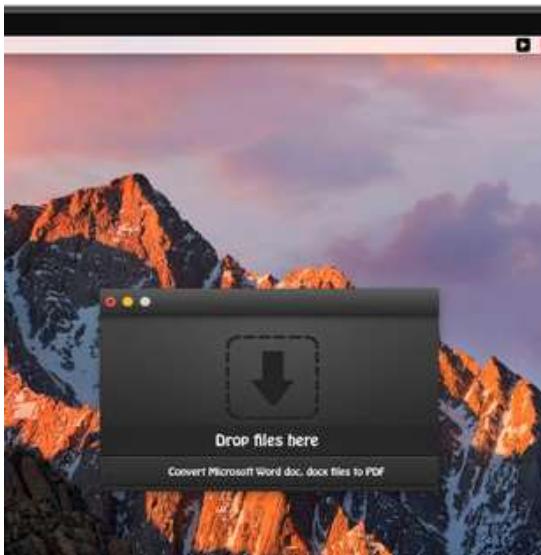

Our Mac expertise includes:

- Comprehensive application development from initial research phase to final usable product
- Carbon and Cocoa development and porting
- Cross Platform Windows/Mac development
- Custom Plugins and Extensions development for MAC products
- X Platform development
- Objective-C

Windows 10 opens up new revenue opportunities, providing a unified store to reach every device running Windows 10. Windows runs on a single, unified core across devices – mobile, desktop, Xbox, or elsewhere. You can reach them all with one codebase and adapt it at runtime as needed.

MAC APPS : Driver Development

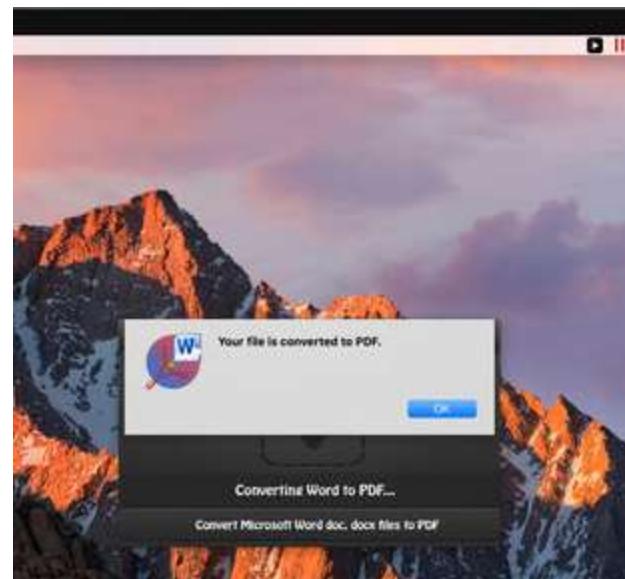

App Name: Easy Word to PDF Converter

Technology: CUPS Driver, GHOST Script from Adobe

App Links: -> [MAC](#)

Your word file is converted to look just the same as it does in your office software. Creating a PDF from doc or docx file has never been so easy! We try to make it as easy as possible to convert your doc files to PDF. You don't need to adjust any settings and the conversion only takes a few seconds

MAC APPS : Driver Development

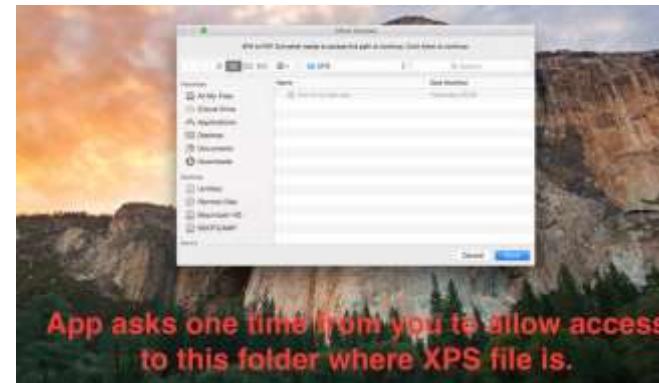

App Name: XPS to PDF Converter

Technology: CUPS Driver, ADOBE GHOST Scripts

App Links: -> [MAC](#)

Convert automatically XPS files to PDF. Super easy- in Finder just click your XPS file (App asks one time from you to allow access to this folder where XPS file is) and your file is automatically converted to PDF in same folder where XPS file is. Just like you would do with zip files extraction.

MAC APPS : Driver Development

App Name: Easy Disk Cleaner 5

Technology: CUPS Driver, ADOBE GHOST Scripts

App Links: -> [MAC](#)

Easy Disk Cleaner 5 – quick, safe and secure cleanup!

Free up your drive space with just a few clicks:

Cleans cache files from the system;

Cleans unwanted system log files;

Cleans Trash to recover more space;

Cleans unfinished downloaded files;

Cleans browser caches;

Cleans mail caches;

Cleans iTunes device backups.

Windows APPS : Data Modelling

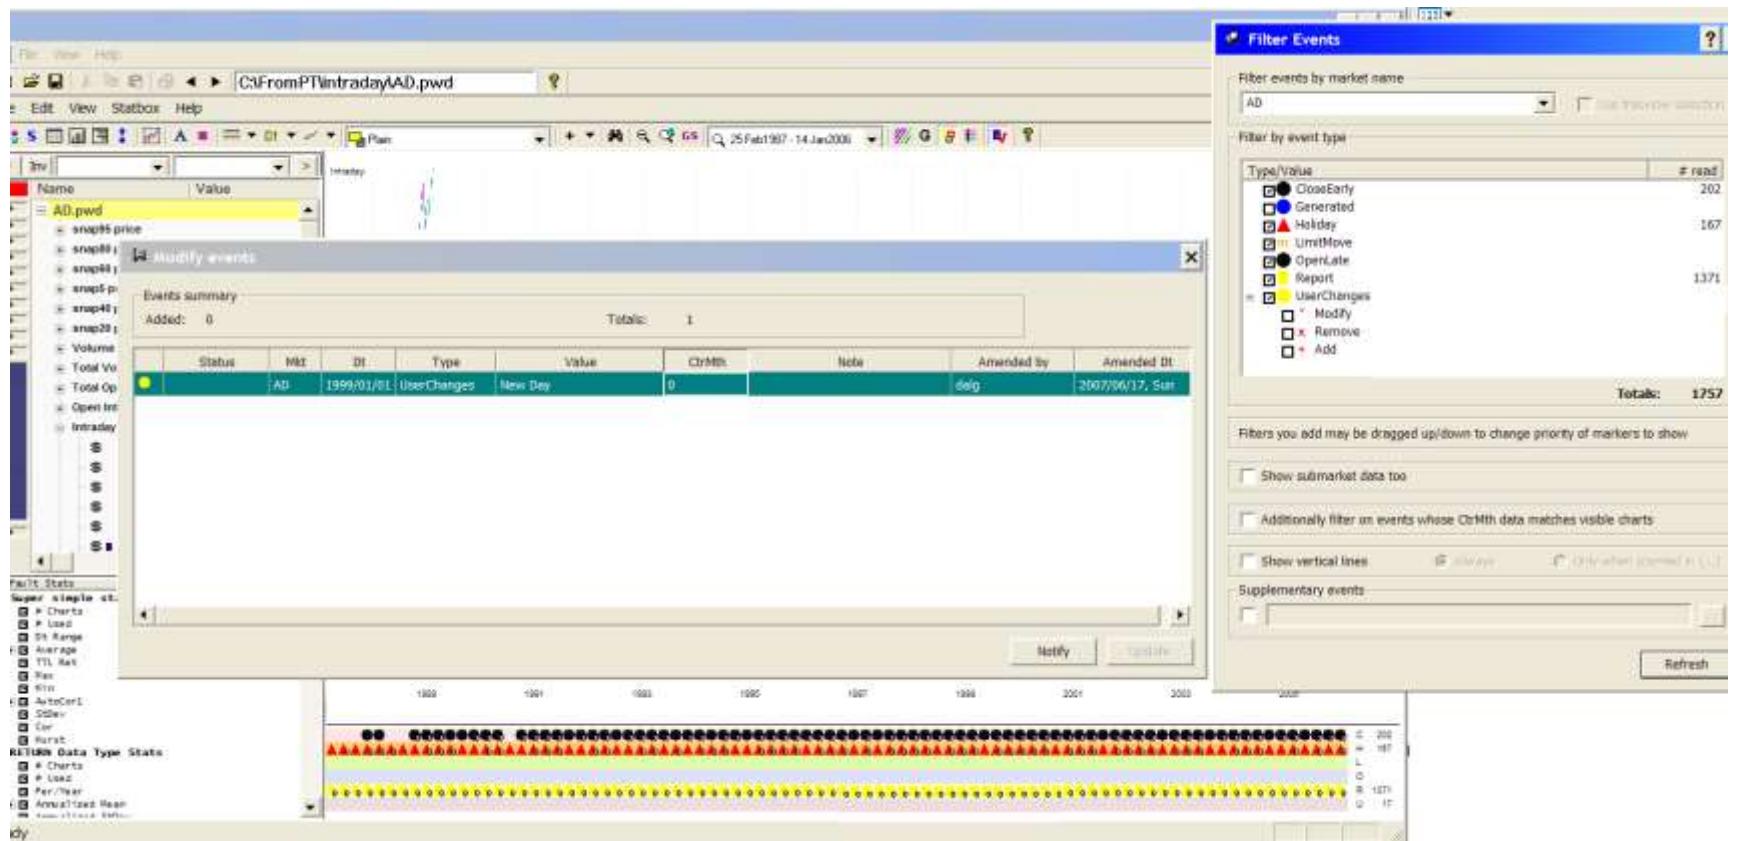

App Name: MR-CHART

Technology: VC++ , Statistical libraries

App Links: -> N.A (Custom Development)

As a Statistical forecasting tool MRCharts is used for predicting the stock prices. Prediction is made by building the regression models for a given set of independent and dependent variables affecting the prices of the stocks and in the process calculate the residuals ($Y - Y^{\wedge}$) for the generated modelsets. This Product has multiple views to show the correlations among the selected factors viz: Heatmap, Plot view , Histograms. Hence a useful tool for the brokers to analyze the correlation.

Windows APPS : CAD

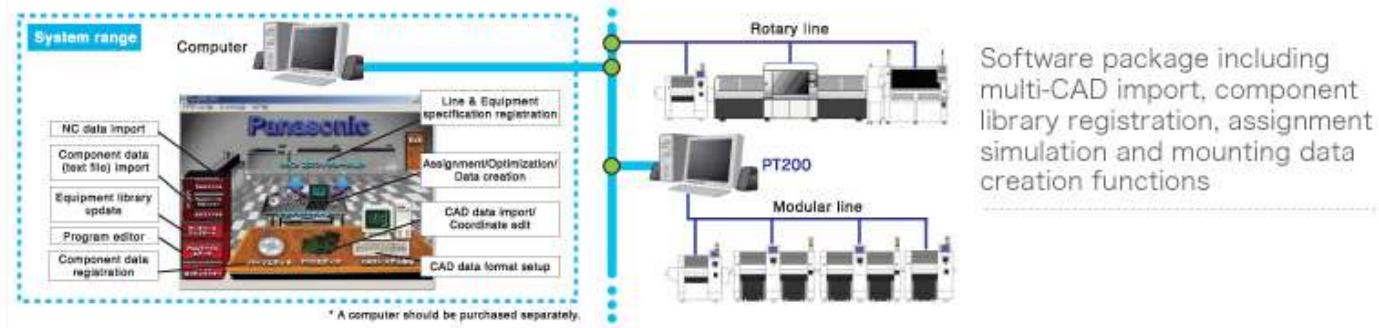

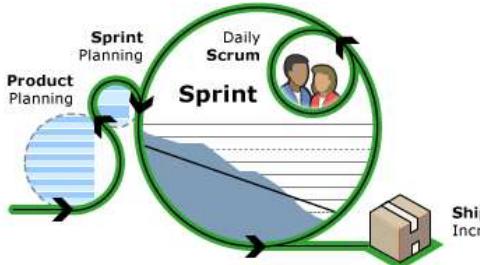

App Name: PanaPro (Panasonics PCB printing software)

Technology: VC++ , Statistical libraries

Pana PRO IPO is a one of the module of Panasonics PCB printing assembly line. In IPO we can import CAD data in ASCII format along with Macro definitions. IPO helped the printing assembling line operators to set the polarity and mounting through simulations to help reduce wastages and bring efficiency in printing process.

Pana PRO IPO Mounting Data Creation System

Agile Software Development

Bharatlogic team members has the average working experience of 5 years+ with scrum methodologies.

We typically adopt following agile process for every project we do:

1. **Product Planning:** At start of every project with client and stakeholders
2. **Sprint Planning:** At start of every iteration with manager and engineers
3. **Tracking:** Daily scrum standup meeting of team leads and engineers. Team updates their status on Trello and checks in code to Gits on daily basis.
4. **Demo:** At end of every iterations with stakeholders and engineers.

Development Process

We at Bharatlogic provide keen attention to our software development process. Process becomes imperative for Mobil Applications because of its association with App markets and shorter gestation cycle. In order to best fit in the regularly changing work of app stores today we follow **Agile methodologies** and deliver in form of iterations/sprints. We have industry experience of using Agile methodologies for more than 10 years.

*"It's pleasure to work with Bharatlogic,
Quality work and works fast."*

-Prabh, PYZE.COM

Our software team conducts the 3 types of test: Unit Tests, Integration tests and functional tests. We use Unit test at compile time, and do the integration tests to pin-point the bug's location better than functional tests, making it faster for developers to diagnose and fix. So we follow the healthy strategy that requires tests at all levels of the technology stack to ensure each part, as well as the system as a whole, works correctly.

Project Backlog:

The Project backlog for a typical mobile application consist of following tasks:

1. Wireframe/design mock up, PSDs approval to client.
2. setting up server – PHP/MySQL/ backend Web services
3. Development tasks for iOS/Android
4. IOS / Android integrations/tied-up with Web services for data
5. Testing & QA
6. Upload to Marketplaces (if required)

Our development teams involve a number of people: developers, testers, designers, product/delivery managers, and executive stake holders. All play a role in the quality of the final application. While developers own the quality relationship with the customer, the QA team alerts the broader organization about risk. So our effective test engineers understand and empathize with the customer as users of the product under development each and every day.

Fixed Price Fixed Time

With clearly defined specifications, scope, deliverables and acceptance criteria, we can offer you a not-to-exceed fixed time & fixed price engagement model. The Fixed Price model is most suited where the scope and specifications of the project are very clear and specific enabling us to complete it within pre scheduled timeframe.

Time & Material

The Time & Material model is usually adopted for product development when the client is not very clear on the specifications, scope and implementation plans at the time of signing the project or requirements may change dynamically during the project implementation process. We offer its skilled resources, and the development effort is billed at the end of every week based on the pre-negotiated and mutually agreed hourly rate.

Business Model

Bharatlogic is focused on establishing a strong and proven relationship with its customers based on trust and values as strong foundation leads to successful experience. Keeping in mind the rapidly changing and diverse needs of IT, we have designed our engagement models as versatile and flexible giving freedom to our clients to choose the appropriate business model that best serves their unique business requirements thus ensuring a successful outsourcing partnership with us. We provide technical assistance and advice, create and recommend a solution and develop a practical implementation plan for offshore IT projects. This allows Bharatlogic to provide service and support those are reliable and customer centric.

Offshore Development Center (Dedicated Resources):

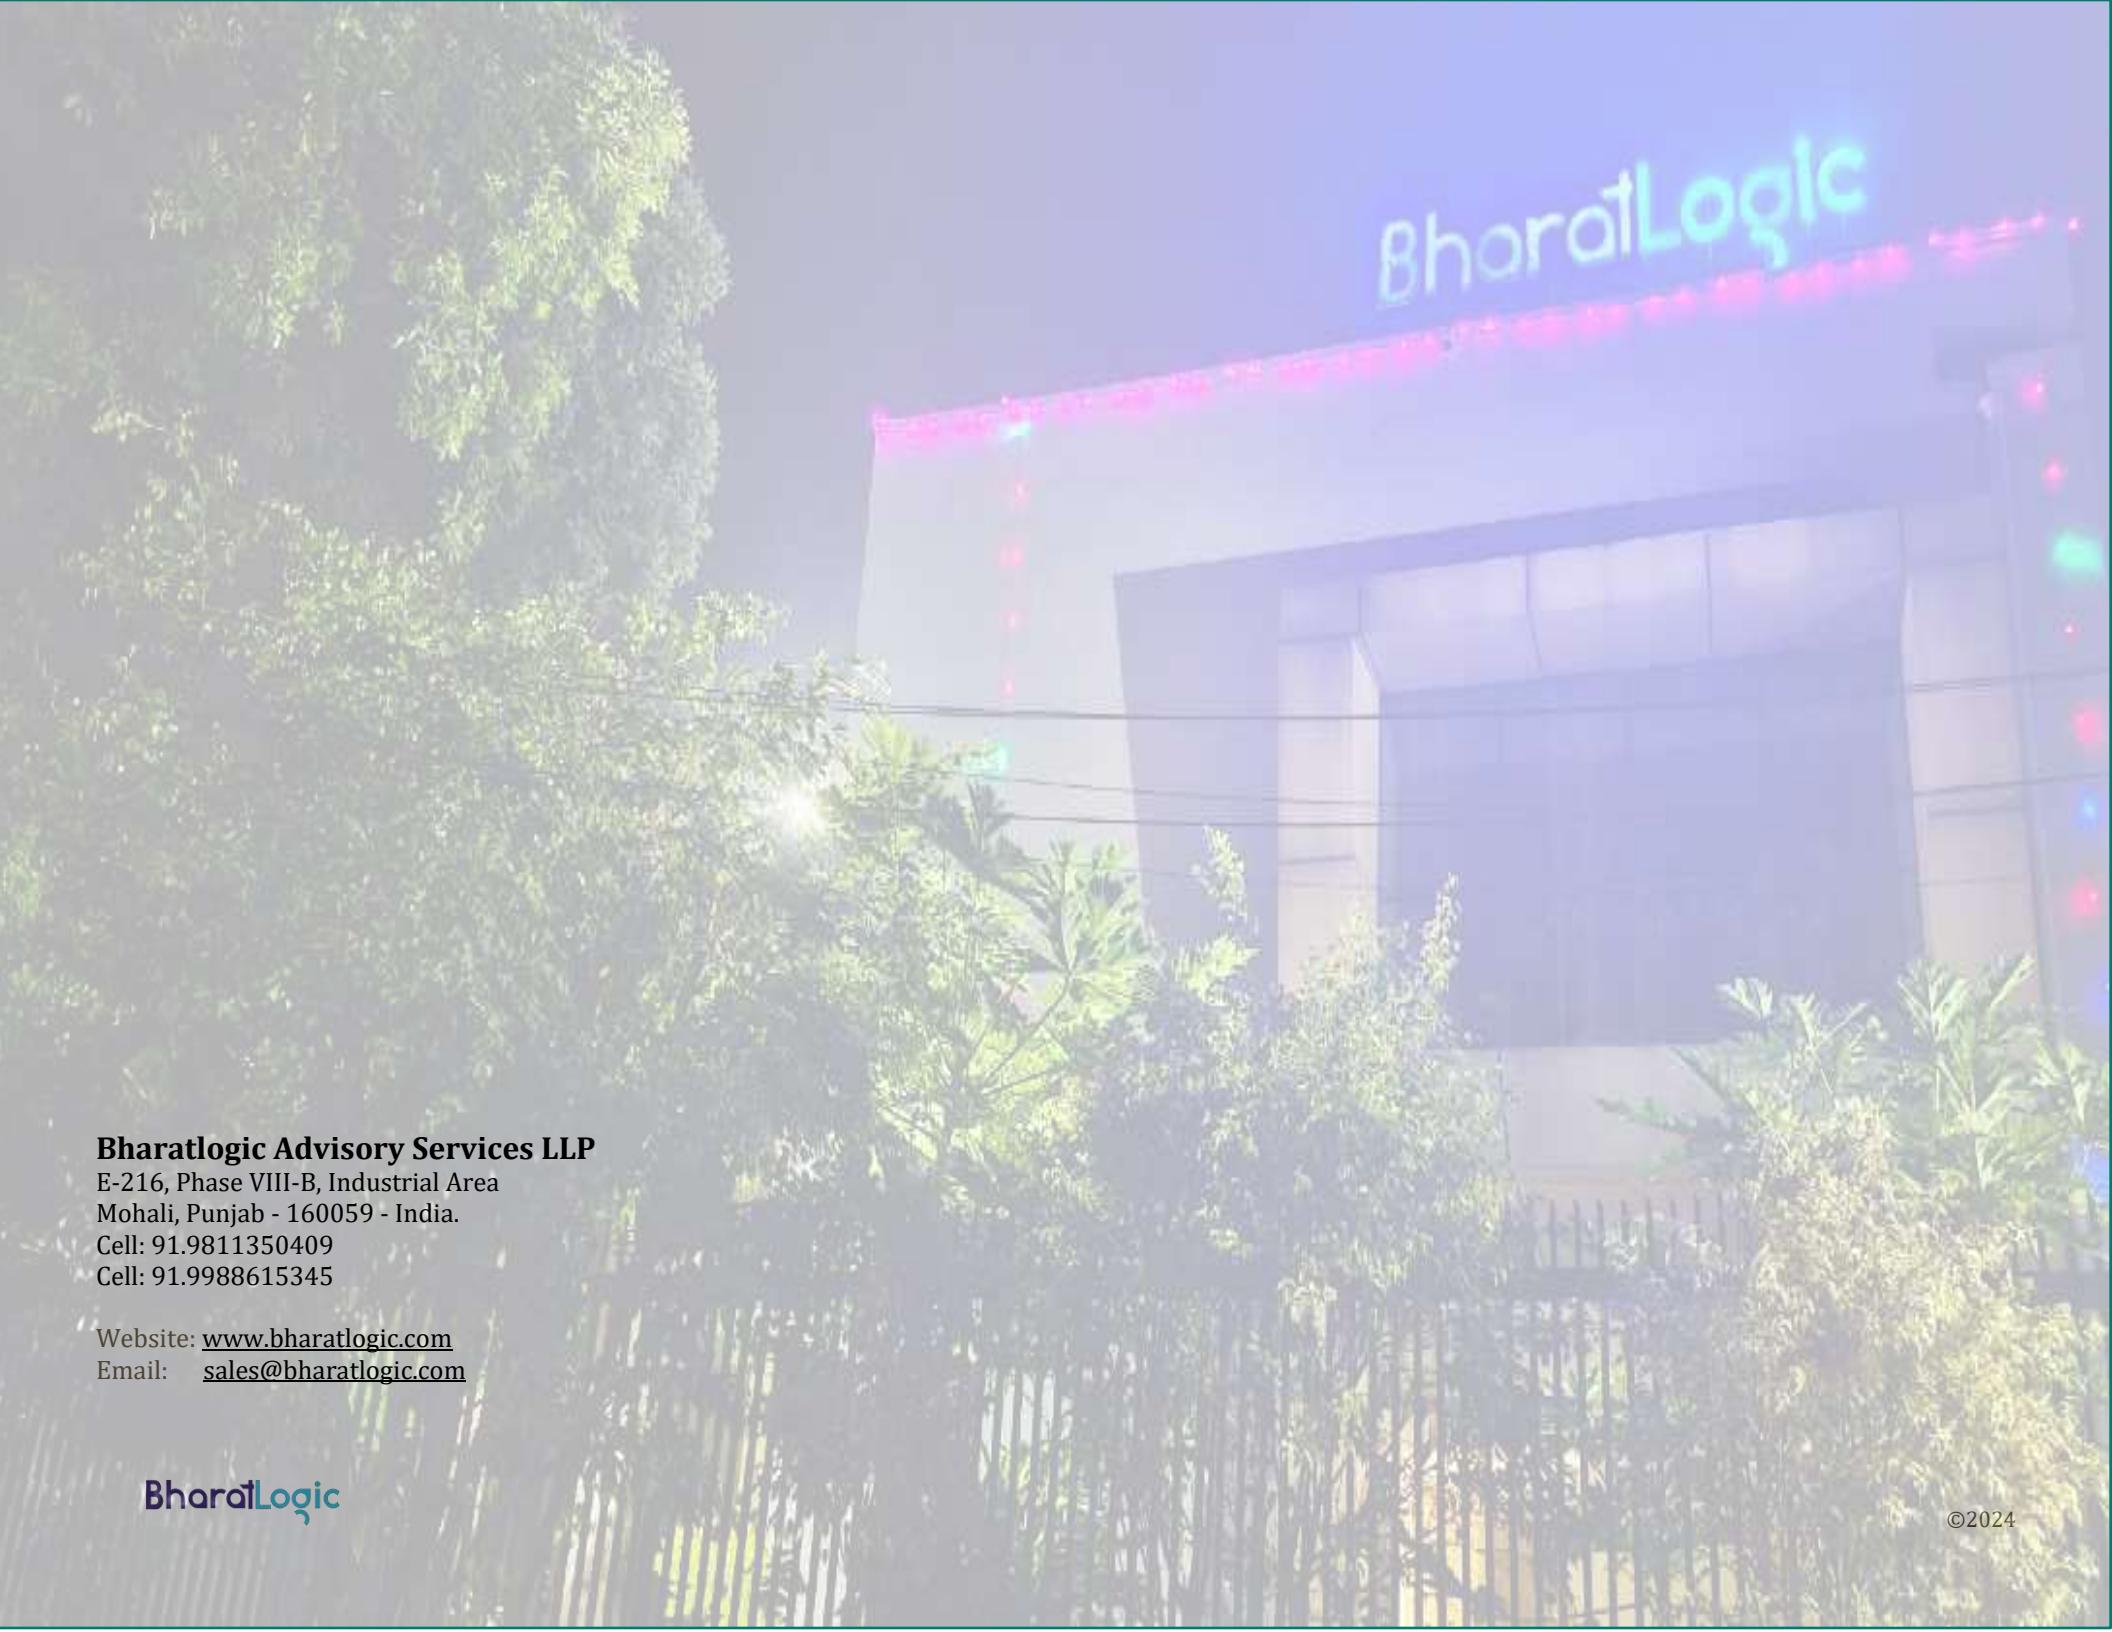

Bharatlogic Offshore Development Center can be integrated with the customer's existing processes to fully support design, development, quality assurance, version control, backup and recovery, thus operating as an efficient and seamless extension of the customer's software development facilities. The Offshore Development Center comprises a dedicated team trained on your line of business, systems and processes, this team can be changed in size when necessary ensuring quick response to your resource requirements.

"Excellent team, excellent people. Very trustworthy an honorable individuals, I am very happy to have met them."

—Cornish A. BR Dev Group.

Free service Warranty:

For small utility apps, we extend 3 month free service warranty after the app is uploaded and approved. For server based app, for quite a big /complex app, we extend 2 month free service warranty after app is approved.
